DEPARTMENT OF THE NAVY
OPERATION AND MAINTENANCE, NAVY RESERVE

INTRODUCTORY STATEMENT

This appropriation, established by the Congress in 1973, provides for the cost of operating the Naval Reserve forces and maintaining their assigned equipment at a state of readiness which will permit rapid employment in the event of full or partial mobilization. These forces, consisting primarily of ships and aircraft and the personnel to man them, are a vital part of the Navy's total force. The cost of operating and maintaining aircraft in the Fourth Marine Air Wing is also contained in this appropriation.

The Operation and Maintenance, Navy Reserve appropriation consists of three budget activities: 1 - Mission Forces; 2 - Depot Maintenance; and 3 - Other Support. Mission Forces funding provides for the operation and maintenance of Reserve force ships and aircraft. Depot Maintenance funding provides support for the Reserve aircraft rework program and the Contractor Support Services (CSS) program. All depot maintenance in support of afloat forces is included within Mission Forces. Other Support encompasses the funding support for various command and administrative activities. In addition, funding to operate and maintain the air stations, Reserve centers and Reserve facilities supporting the Naval Reserve forces is included.

The FY 1990 planned average operating aircraft are 648.0. The planned FY 1990 end year Naval Reserve Force ship inventory is 51. This number includes twenty-six Frigates, eighteen Minesweepers, one Mine Countermeasures ship, three Amphibious ships, and three Salvage ships.

The FY 1991 planned average operating aircraft are 657.0. The planned FY 1991 end year Naval Reserve Force ship inventory is 52. This number includes twenty-six Frigates, fourteen Minesweepers, five Mine Countermeasures ships, four Amphibious ships, and three Salvage ships.

The FY 1990 and FY 1991 flying hour program supports 86.75% of full primary mission readiness requirements for the Naval Reserve.

All available audit savings have been incorporated into the following budget estimates.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces

I. Description of Operations Financed.

This budget activity provides funds for the operation and maintenance of Naval Reserve Force ships, the operation of Navy and Marine Corps Reserve Force aircraft, and the operation of other Reserve units including Mobile Inshore Undersea Warfare Forces, Reserve Naval Construction Forces, and Cargo Handling Battalions. Funding is provided for such things as aircraft flying hours, underway steaming hours, regular ship overhauls, and ship maintenance and modernization.

Budget Activity: 1 - Mission Forces (Cont'd)

	FY 1989	FY 1990	FY 1991
<u>B. Reconciliation of Increases and Decreases Cont'd)</u>			
1. FY 1989 President's Budget	610,027		
2. FY 1989 Appropriation	610,027		
3. Pricing Adjustments	-528		
a. Other Pricing Adjustments	(-528)		
4. Functional Program Transfer	-223		
a. Intra-Appropriation	(-223)		
1) SeaBee funding to BA3	-223		
5. Program Increases	+14,898		
a. Other Program Increases	(+14,898)		
1) AVDLR Flight Hour Costs	+3,340		
Higher projected cost based on actual costs experienced in FY 1988.			
2) Airbone Mine Counter Measures Equipment	+1,300		
Increased support and maintenance of equipment procured for HM-18 and HM-19.			
3) Intermediate Maintenance	+3,000		
Increased IMA requirements for larger frigate inventory, based on prior experience.			
4) MSO Deferral Program	+1,800		
Increase in required maintenance shipalts in order to extend MSO's service life; required due to delays in MCM deliveries.			

Budget Activity: 1 - Mission Forces (Cont'd)

<u>B. Reconciliation of Increases and Decreases Cont'd)</u>	<u>FY 1989</u>	<u>FY 1990</u>	<u>FY 1991</u>
5) Special Boat Unit Operations Costs Increased utility and other facility costs for SBU Two.	+45		
6) Fleet Operations Training Support Increased TAD requirements for selected mobilization billets.	+293		
7) Maritime Prepositioning Ships (MPS) Increased support for training on three MPS ships and the Reserve Cargo Handling Training Battalion.	+185		
8) Fleet Modernization Program (FMP) +4,935			
a. Modernization costs associated with major RAV on LST-1190 as a result of grounding (+2,051).			
b. Replace auxiliary boiler on ARS-38 and ARS-42 (+819).			
c. Revised estimate of installation costs associated with FFG Shipalt packages based on actual contract award of first two units in FY 1988 (+2,065).			
6. Program Decreases		-21,707	
a. Other Program Decreases	(-21,707)		
1) CT-39 Flight Hours	-241		
Reduced flight hour requirement based on recent fleet requirements.			
2) USS EDSON Decommissioning	-1,438		
Reduced operating costs due to earlier than programmed decommissioning date.			

Budget Activity: 1 - Mission Forces (Cont'd)

B. Reconciliation of Increases and Decreases Cont'd

FY 1991

FY 1990

FY 1989

- | | |
|--|--------|
| 3) Persian Gulf Operations | -4,068 |
| Decreased operating costs resulting from reduced operating months due to NRP units deployed in support of active forces in the Persian Gulf. Funds realigned to offset emergent ship maintenance requirements. | |
| 4) Restricted Availabilities/Technical Availabilities (RA/TA) | -8,718 |
| a. Decrease associated with the postponed transfer of the USS COPELAND and USS MEYERKORD from active fleet to Naval Reserve (-5,061). | |
| b. USS EDSON Decommissioning SRA avoided by decision to decommission in FY 1989 (-3,657). | |
| 5) SIMA Upgrade | -71 |
| Fewer items of machinery to be installed. | |
| 6) ASW Systems Support | -358 |
| Three fewer Weapons System Accuracy Tests are scheduled. | |
| 7) Sonar Overhaul | -368 |
| Reduced maintenance requirements for MSO sonar equipment. | |

Budget Activity: 1 - Mission Forces (Cont'd)

<u>B. Reconciliation of Increases and Decreases Cont'd)</u>	<u>FY 1989</u>	<u>FY 1990</u>	<u>FY 1991</u>
8) Fleet Modernization Program (FMP) -5,325			
a. Availabilities for one FF and one MSO rescheduled (-3,201).			
b. Rescoping of FFG Shipalt requirements (-676).			
c. Elimination of Shipalts on two MSOs (-521).			
d. Reduced MSO FMP requirements (-927).			
9) Outfitting -1,107			
Reduced requirements based on earlier than programmed decommissioning of USS EDSON.			
10) Supplies and Equipment -13			
Decreased requirement for surface support forces.			
7. FY 1989 Current Estimate	602,467		
8. Functional Program Transfers		+256,495	
a. Intra-Appropriation (+257,092)			
1) BOS, MRP, Recruiting and Advertising from BA3 +247,432			
2) Reserve Technical Support Services from BA2 +9,660			
b. Inter-Appropriation (-597)			
1) Base Operations +526			
a. Hazardous Waste (+532)			
b. Discrimination Complaint (-6)

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces
Activity Group: Reserve Air Forces

I. Description of Operations Financed. Naval Reserve Air Forces consist of two carrier air wings with a total of fifteen squadrons, two long-range ASW patrol wings with a total of thirteen squadrons, one helicopter wing with nine squadrons, and one air logistics wing with fourteen squadrons. The Fourth Marine Corps Air Wing consists of twenty-one flying squadrons and supporting units which are budgeted for and supported by Commander, Naval Reserve Force. The mission of the Naval Reserve Air Force is to provide combat ready aviation forces which will permit rapid deployment in the event of full or partial mobilization. Air Reserve units are of two basic types: (1) those with combat ready aircraft assigned (squadrons), and (2) those without their own equipment (augment units). The latter type maintains combat readiness using the equipment of the Reserve or Regular Navy squadrons. Upon mobilization the augment units join regular Navy squadrons to provide them with manning needed to fly and maintain their aircraft under wartime operations. A high level of combat readiness is required of these forces if they are to be effective during the early stages of war when decisive operations will occur.

Funds requested will provide fuel, oil, lubricants, consumable parts, repairable parts, replacement flight clothing, and emergency equipment such as parachutes and life rafts, and miscellaneous supplies needed for squadron operation. In addition, costs of simulators and instrumented ranges used for crew training and squadron travel expenses are included.

Flying levels requested are based on operating syllabi for each type of squadron, and represent 86.75 percent (and an additional .25% simulator use) of total TACAIR/ASW pilot annual training requirements in FY 1989, FY 1990 and FY 1991. Land-based squadrons, except Maritime Patrol Aircraft (VP), require 130 hours per pilot annually to attain and maintain combat readiness. VP squadrons require 140 hours per pilot annually because of inflight torpedo and mining qualifications. Carrier-based squadrons require 150 hours per pilot annually. Twenty hours are needed for simulated carrier landing practice at an airfield and for refresher carrier landings aboard ship. Carrier landings must be made each year to maintain skills needed for combat deployment.

Flying levels for logistic aircraft (C131, C9, DC9, C12, C20 and T39) and base operating aircraft (TA4J, A4M, and TA4F) are based on a monthly utilization factor for the particular aircraft type, not on an annual pilot training requirement.

Activity Group: Reserve Air Forces (Cont'd)

II. Financial Summary (Dollars in Thousands)

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces
Activity Group: Reserve Surface Support Forces

I. Description of Operations Financed: This activity group is comprised of surface support operating forces. The mission is to provide combat ready forces for immediate deployment in time of full or partial mobilization. The objective is to maintain adequate skill levels in highly technical specialties through training during weekend drills and active duty training.

The Surface Support Forces are composed of several related but distinct programs. The programs financed include: Construction (SEABEES) Forces, Cryptologic Activities (Security Groups), Intelligence Training Activities, Ordnance Handling Support Activities (Explosive Outloading Teams), and Special Combat Support Forces. The Special Combat Support Forces include Mobile Mine Assembly Groups (MOMAGS), Amphibious Construction Detachments, Beachmaster Units (BMU), Assault Craft Units (ACU), Mobile Inshore Undersea Warfare (MIUW) Units, Underwater Demolition Teams (UDT), Cargo Handling Battalions (CHB), Explosive Ordnance Disposal (EOD) units, Navy Beach Groups (NBG), and Mobile Diving and Salvage Units (MDSU). The Classic Buoyant System is a program that uses state-of-the-art electronics equipment which provides live cryptologic training for Naval Reserve Security Group personnel in support of the National cryptologic mission.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces
Activity Group: Reserve Ship Operations

I. Description of Operations Financed. The missions and objectives of Naval Reserve ships are to train Selected Reservists, to augment regular naval forces, to conduct operations to ensure control of the sea, and to provide combat ready ships in support of national objectives. The FY 1990 and FY 1991 requests support reserve ship operating tempo of 21 days per quarter. This operating tempo will enable the Naval Reserve to continue to accomplish underway training and exercises to improve the readiness of Naval Reserve Force ships. Ship Operations funding provides support for 48.0 ship years in FY 1990, and 51.0 ship years in FY 1991 for the following requirements:

Ship Fuel. Includes ship propulsion fuel to operate the main plant/engines of the conventionally powered ships, auxiliary diesel engines of auxiliary equipment and small boats.

Ship Utilities. Includes the cost of steam, electricity, water, sewage treatment and other utilities (excluding telephone and garbage removal) incurred by Naval Reserve Force ships and certain centrally managed service craft while partially or totally "cold iron" (i.e., receiving shore services vice having the engineering plant on the line).

Repair Parts. Includes all repair parts and repair related consumables required to accomplish organizational level equipment maintenance. Organizational level maintenance is that corrective and preventive maintenance accomplished by the ship's crew. Organizational maintenance is a blend of equipment operation, condition monitoring and repair ranging from simple equipment lubrication to component changeout and, in some cases, complete rework in-place.

Other Operational Target (OPTAR). Includes administrative and housekeeping items, forms, routine maintenance tools which may be used in the repair of equipment, and other items having a limited life such as lubricants, boiler compound and bilge cleaner. Included are equipment items such as damage control pumps and blowers and labor-saving devices such as power tools, office machines and duplicators.

Activity Group: Reserve Ship Operations (Cont'd)

II. Financial Summary (Dollars in Thousands)

A. Sub-Activity Breakout	FY 1988 Actual	Amended Pres Budget	FY 1989		FY 1990 Budget Request	FY 1991 Budget Request

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces
Activity Group: Reserve Ship Maintenance and Modernization

I. Description of Operations Financed. The Naval Reserve Ship Maintenance Program, including the Fleet Modernization Program (FMP), encompasses industrial repairs, ship upgrade/modernization, material used by tenders and shore facilities to perform intermediate level maintenance, and other scheduled and emergent refurbishment necessary to achieve and maintain adequate readiness of the Naval Reserve ships. Depot and intermediate levels of maintenance are funded in this program. Organizational level repairs are included with ship operational expenses. The objective of the maintenance program is to accomplish required maintenance at the lowest level maintenance activity having requisite capability and capacity. Existing maintenance concepts are being revised into structured operating and maintenance cycles engineered to balance resources with requirements.

A. The Overhaul Program funds the depot level maintenance of those Naval Reserve ships that have completed the prescribed operating cycle and are due for regular overhaul. During overhaul the ships are drydocked and receive extensive hull/superstructure and equipment/system repairs.

B. The Restricted Availability/Technical Availability (RA/TA) program funds both scheduled and emergent depot level maintenance of Naval Reserve ships. A Restricted Availability (RA) is for the accomplishment of specific items of work by a repair activity, normally with the ship present, during which period the ship is rendered incapable of fully performing its assigned mission. Included in the RA category are Selected Restricted Availabilities (SRAs) for FFG-7 class ships, MCMS and MSOs, and Phased Maintenance Availabilities (PMAs) for FF-1052 and LST-1179 class ships. A technical availability (TA) is for the accomplishment of specific items of work on ship equipment by a repair activity, normally without the ship present, during which the ship is able to fully perform its assigned mission.

C. The Intermediate Level Maintenance (IMA) program funds maintenance which is normally performed by Navy personnel on tenders, repair ships and Shore Intermediate Maintenance Activities (SIMA). IMA personnel perform maintenance aboard customer ships and also remove equipment for repairs in IMA facilities. SIMAs also assist in the accomplishment of organizational level maintenance deficits that result from the unique Active duty/Selected Reserve crew composition aboard Naval Reserve ships. The organizational level shortfall is compounded by reduced authorized crew sizes and more sophisticated equipments/systems aboard the newer Naval Reserve ships.

Activity Group: Reserve Ship Maintenance and Modernization (Cont'd)

D. The Fleet Modernization Program (FMP) funds the installation of authorized military and technical ship improvement alterations to enhance mission capability, safety and habitability of Naval Reserve ships. This funding also includes the cost of preliminary design, preparation of blueprints, installation of equipment, the procurement and stocking of spare parts and the updating of ship's records to reflect the installation. The program encompasses alterations required by government-wide regulations or readiness and safety related considerations. Alterations include firefighting and safety, communications, hull, mechanical and electrical, pollution abatement, ship survivability and navigation improvements.

E. The Outfitting program funds initial outfitting and allowance requirements of all stock funded expense type material (including DLRs), spares, repair parts, special tools, and shipboard equipment allowances as well as all follow-on equipment improvement programs outfitting requirements. At Congress' direction, ship outfitting requirements are funded in Other Procurement, Navy (OPN) beginning in FY 1989. Funding in FY 1990 and FY 1991 have been realigned accordingly.

F. Engineering Operation Cycle (EOC) is the Naval Reserve Phased Maintenance Program that develops and implements a phased maintenance program for FF-1052 class ships of the Naval Reserve. It includes a revised operation and maintenance schedule and improved work package determinations. The Phased Maintenance Program is intended to plan and implement a strategy for the conversion of eight Naval Reserve FF-1052 class ships from conventional overhaul to phased maintenance in order to avoid periods of 8 months or longer during which a ship is not available. The phased maintenance strategy is designed to improve operating schedules of combatants without adversely affecting their operational performance by substituting for the current 8-9 month overhaul a series of Phased Maintenance Availabilities (PMAs) of 3 months duration separated by eighteen months of operation, followed by a 4-month PMA during which the ship will be dry-docked.

Another portion of these funds is for accomplishment of repairs and overhauls of electronic equipment and modules installed on Naval Reserve FFG-7 and FF-1052 class ships. As a result of the EOC and LO-MIX maintenance strategy, major electronic modules and equipment are changed-out and shipped to rework facilities for screening, refurbishment and subsequently returned to a pool for issue during availabilities of other EOC and LO-MIX ships.

G. The FFG-7 Class LO-MIX Support Program develops and implements required changes to the Naval Reserve FFG-7 Class ship in order to provide an effective life cycle support system for the 18 ships of the class transferring to the Naval Reserve between FY 1985 and 1991. LO-MIX features of Active FFG-7 class ships (minimal manning, progressive overhaul, expanded use of repairables, Class Maintenance Plan and Maintenance Criticality Oriented (MCO) COSAL must be modified to accommodate unique characteristics (operating tempo, manning, homeport assignments) of FFG-7 class Naval Reserve Force ships.

Activity Group: Reserve Ship Maintenance and Modernization (Cont'd)

H. The Intermediate Maintenance Activities (IMA) Upgrade program, initiated in FY 1985, is intended to: (1) fund site preparation and facility engineering and support for eight Shore Intermediate Maintenance Activities Naval Reserve Maintenance Facilities (SIMA/NRMF) which are being established coincidentally with the expansion of the Naval Reserve ASW Frigate Program to provide organic intermediate level maintenance capabilities at NRF combatant homeports; and (2) provide similar funding support at active SIMA's, in proportion to the number of NRF ships homeported at active ports.

- Increased workyears required for projected IMA workload based on increased shipyears, ship mix, and a backlog from prior years.

- 4) SIMA Upgrade +649
- Increased technical and logistics services associated with the initial outfitting of SIMA Puget Sound.

FY 1990

183,329

+6,106

+19,782

FY 1991

Activity Group: Reserve Ship Maintenance and Modernization (Cont'd)

B. Reconciliation of Increases and Decreases	FY 1989	FY 1990	FY 1991
5) Fleet Modernization Program (FMP) a. One additional FF-1052 class, and two additional LST class PMA FMP packages (+1,966). b. Increase in K-ships on FF-1052 class availabilities for Aqueous Film Forming Foam (AFFF) systems update, AN/SQR-18A (TACTAS), Close-in Weapons System (CIWS), and pollution abatement alterations (+3,674). c. Increase in design and planning yard service requirement to support Fleet maintenance and modernization programs for NRF Frigates (+1,260).			+6,900
6) LOMIX Increase in the FFG class maintenance support plan.			+100
4. Program Decreases a. One-time FY 1989 Increases 1) USS BOULDER RAV Major RAV completed in FY 1989.			-16,898
2) Restricted Availabilities/Technical Availabilities (RA/TA) Reduced availability cost because of higher mix of low cost class ships.			-7,889
b. Other Program Decreases in FY 1990 1) Restricted Availabilities/Technical Availabilities (RA/TA) Decrease in number of availabilities			(-8,469) -5,378

Activity Group: Reserve Ship Maintenance and Modernization (Cont'd)

B. Reconciliation of Increases and Decreases FY 1989 FY 1990 FY 1991

coupled with a change in the ship classes:

Type	Class	Decrease
ROH	MSO	-1
PMA	ARS	-1
SRA	MSO	-2

2) Engineering Operation Cycle (EOC) -212
Decrease reflects reduction in technical assists for combat system testing on FF-1052 class ships.

3) LOMIX -132
Decrease in Life Cycle Support for FFG-7 class ships.

4) Fleet Modernization Program (FMP) -2,747
a. One less ARS class FMP package (-455).
b. Reduced separate funding line requirements for propulsion mods, MACH ALTS and FFG-7 class items (-2,302).

5. FY 1990 President's Budget Request

192,319

6. Price Growth
a. Stock Fund Rates (+335)
1) Non-Fuel +335
b. Industrial Fund Rates (+636)
c. Other Pricing Adjustments (+4,537)

+5,508

Activity Group: Reserve Ship Maintenance and Modernization (Cont'd)

<u>B. Reconciliation of Increases and Decreases</u>	<u>FY 1989</u>	<u>FY 1990</u>	<u>FY 1991</u>
7. Program Increases			
a. Other Program Growth in FY 1991	(+18,917)		
1) SIMA Upgrade	+300		
Increased installation of SIMA equipment.			+18,917
2) Fleet Modernization Program	+4,663		
a. Increased cost of AN/SQR-18A and SA-2112(V) Single Audio System (SAS) installation on FF-1052 class ships (+1,850).			
b. Halon system upgrade on two FFGs (+1,690).			
c. Modernization on MCM class ships (+1,123).			
3) Intermediate Maintenance Materials Increase for stock fund materials and Contractor Industrial Services based on projected workload.	+1,237		
4) Industrial Plant Equipment (IPE) Increase for IPE repair program and increase of stock fund purchases.	+1,084		
5) MSO Overhaul Advance Funding MSO-449 ROH scheduled for FY 1992.	+250		
6) Emergent Repairs Increase associated with larger inventory and higher number of operating months.	+613		

Activity Group: Reserve Ship Maintenance and Modernization (Cont'd)

B. Reconciliation of Increases and Decreases FY 1989 FY 1990 FY 1991

- 7) Restricted/Technical Availabilities +10,770
 Increase in number of availabilities
 coupled with a change in the ship classes:

Type	Class	Increase
PHA	ARS	+1
SRA	MCH	+2
SRA	MSO	+3

8. Program Decreases

- a. Other Program Decreases in FY 1991 (-26,786)

1) SIMA Upgrade

-1,457

Decreased technical and logistics services associated with completion of installations at SIMAs San Francisco and Staten Island.

-26,786

2) Fleet Modernization Program (FMP) -17,669

- a. Decreased firefighting, berthing and CIWS alteration requirements for FF-1052 class ships (-5,148).
 b. Decreased FFG-7 class modernization requirements, including CIWS (-6,784).
 c. Decreased LST modernization (-4,487).
 d. Decreased design and planning yard services as a result of overall lower FMP requirements (-1,250).

3) Hull Cleaning/Habitability Improvements -227

Decreased requirements across various ship classes.

Activity Group: Reserve Ship Maintenance and Modernization (Cont'd)

B. Reconciliation of Increases and Decreases

FY 1991

FY 1990

FY 1989

4) Restricted/Technical Availabilities -7,433
 Decrease in number of availabilities
 coupled with a change in the ship classes:

Type	Class	Decrease
PMA	LST	-1
SRA	FFG	-2

9. FY 1991 President's Budget Request

<u>Civilian End Strength</u>				

There are no civilian personnel assigned to this activity group.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces

Activity Group: Overhaul and Maintenance of Reserve Ship Equipment
and Related Support

I. Description of Operations Financed. This program encompasses depot level overhaul and modernization of specific Naval Reserve ship equipment not included in the normal Type Commander overhaul program. Repairs are, however, normally accomplished simultaneously with the Type Commander scheduled maintenance availabilities including Regular Overhauls (ROH), Phased Maintenance Availabilities (PMA) and Selected Restricted Availabilities (SRA).

The Sonar Overhaul and Mine Countermeasures (MCH) Equipment Maintenance Program provides for depot level restoration/repair of transducers and hydrophones for sound navigation and ranging (SONAR), underwater communications, depth measuring equipment and surface mine countermeasure equipment, in direct support of all classes of Naval Reserve ships and the Craft of Opportunity Program (COOP).

The Gun Overhaul Program provides for the depot level restoration/repair of Gun Weapon Systems on Naval Reserve ships.

The Antisubmarine Warfare Systems Support Program provides for depot level refurbishment of ASROC launchers and torpedo tubes installed on Naval Reserve ships. The program also provides for weapons systems accuracy trials (VSAT) associated with the ASV systems of Naval Reserve frigates.

The Missile Weapons System Equipment Maintenance Program provides technical support and material services required for operation, maintenance and installation of Missile Weapon Control Systems and Guided Missile Launching Systems. The program provides funding to rework MK 92 Fire Control System antennas, Combined Antenna Systems (CAS), and System Tracking and Illuminating Radars (STIR) for Naval Reserve FFG-7 class ships.

The Test, Measuring and Diagnostic Equipment/Metrology and Calibration (TMDE/METCAL) Program supports the calibration of electronic test equipment requirements on FFG-7 class ships for monitoring and maintaining the performance level of systems/equipments. TMDE is any device which measures, calibrates, gauges, tests, inspects, monitors, diagnoses or otherwise examines the operating or physical characteristics of a system/equipment or materials/supplies.

Activity Group: Overhaul and Modernization of Reserve Ship Equipment and Related Support (Cont'd)

The Ship System Tactical Software Maintenance Program provides for life cycle maintenance of fleet operational Navy Tactical Data System (NTDS) computer programs aboard NRF FFG-7 combatants. This support consists of resolution of Program Trouble Report (PTRs), implementation of required operational software updates and subsequent dissemination of tactical operational software tapes to the FFG-7 platforms.

The Search Radar Maintenance Program provides for major maintenance and repair of the search radars installed on Naval Reserve ships and craft. This program provides for restoration of search radar equipments and engineering services to support the operation and maintenance of the search radars. Equipment is removed from ships as necessary and shipped to the appropriate repair facility for restoration. Requirements are based on replacement commitments to specific ships during ROH/RAV periods and/or time usage factors. Estimates also include support to assist in repairs of radar casualties aboard Naval Reserve ships; these estimates are based on historical experience with search radar performance data. Restored material provides equipment for approximately twenty-five percent of the cost of new procurement.

IV. Personnel Summary

There are no military or civilian personnel assigned to this activity group.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces
Activity Group: Reserve Force Engineering Services Support

I. Description of Operations Financed. This activity group provides technical support for Naval Reserve Mine Countermeasures maintenance programs and for the E-2C computer program. Commencing in FY 1990, this activity group also provides Contracted Support Services (CSS) training for Naval Air Reserve activities aviation maintenance personnel at the organization and intermediate levels to assure in-house capability and maintainability of assigned aviation systems and equipment and maintain Naval Air Reserve readiness.

The Mine Countermeasures (MCM) Support program covers two task areas. The first is MCM Maintenance Support for minesweeping systems, mine hunting systems, mine navigation systems and mine neutralization systems. This includes: (a) equipment maintenance analyses to develop solutions to problems identified by the operating units; (b) maintenance procedures and systems performance issues at depot and intermediate sites; and, (c) programs for material receipts, document resource data, and report compilation (units are number of MCM systems/components). The second task area is MCM Systems Engineering Support, which includes: (a) analysis of hardware, operational employment, and delivery vehicle interface deficiencies; (b) development and evaluation of corrections for deficiencies; and (c) liaison with fleet units to assess equipment performance and operational employment status.

The E-2C computer program provides support for Air Tactical Data Systems (ATDS) aboard E-2C aircraft and consists of the resolution of program trouble reports, implementation of required operational software updates, and subsequent dissemination of tactical operational software tapes to E-2C platforms. Funding also provides for the replacement of faulty digital data recorder reproducer tapes which have exceeded their service use life.

The CSS services are provided by commercial/industrial companies which provide advice, liaison, on-the-job and classroom training to Naval Air Reserve activities aviation personnel in the installation, maintenance, repair and operation of all types of aviation systems and equipment.

IV. Personnel Summary:

There are no military or civilian personnel assigned to this activity group.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 1 - Mission Forces

Activity Group: Reserve Special Combat Support Forces

I. Description of Operations Financed. The Special Combat Support Forces consist of Special Boat Squadrons and units with the assigned mission of operating and maintaining Fast Patrol Boats and other combatant craft in support of special warfare readiness and training objectives. The primary purpose of the combatant craft is to support the Naval Special Warfare Commander in fulfilling missions related to coastal and inland waters and in support of amphibious operations. The Mine Countermeasures Craft of Opportunity Program (MCM COOP) initiated in Fiscal Year 1984 is designed to augment the Navy's Mine Countermeasures forces. The COOP program uses converted commercial and Navy patrol craft to conduct harbor/channel route surveys in peacetime and assist with the mine clearance mission in wartime.

This activity group provides for administration (including travel), craft operations (fuel and consumables), and craft maintenance/repair in support of unconventional warfare/assault craft/riverine elements of the Naval Reserve Force.

Budget Activity: 1 - Mission Forces
Activity Group: Reserve Fleet Operations Support

I. Description of Operations Financed. This program provides for the travel of active duty personnel assigned to Naval Reserve Force ships/craft and their supporting staffs. The program supports a wide variety of operational training and administrative travel requirements to ensure that personnel are trained to perform their functions in a manner that will enable the fleet to maintain a high level of readiness. Costs incurred represent support for transportation, plus per diem and miscellaneous expenses. They also provide for professional, technical, team and administrative training.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 3 - Other Support
Activity Group: Base Operations

I. Description of Operations Financed. Program supports the operation of six Naval Air Stations, two Naval Air Facilities, seven Naval Air Reserves, seven Naval Air Reserve Centers, sixteen Naval Reserve Readiness Commands, 228 Naval Reserve Centers and Facilities, one Naval Support Activity, the Naval Reserve Financial Information Processing Center, and the Naval Reserve Personnel Center. Their mission is to provide services and material in support of the Naval Reserve and other activities as designated by the Chief of Naval Operations.

The objectives of the Naval Reserve shore installations are to provide responsive services and support to Reserve forces and assigned activities; ensure updated capability for maintaining personnel skill proficiencies; maintain and protect investments in facilities, equipment, weapons and weapon systems; provide adequate personnel services; meet acceptable standards of habitability, health and safety in living and work areas; and effectively manage resources for proper and efficient utilization, including the protection/enhancement of the environment and conservation of natural resources.

The Selected Reserve training objective is currently the most challenging and dynamic of the Base Operations missions. In response to a 1983 Navy Inspector General assessment of surface reserve training, the Navy Reserve has embarked on a multi-faceted series of initiatives to improve the mobilization readiness of personnel assigned to non-Naval Reserve force (non-hardware) units. The Surface Program to Upgrade Readiness (SPUR) is an extension of the Surface Reserve Training Plan begun in FY 1986. SPUR blends vastly improved training methods, better allocation of training resources and restructuring of mobilization billet requirements to produce trained, rather than trainable, Reservists and a more ready Naval Reserve.

Additional services funded within this activity group are: the screening and assignment of Reserve personnel for mobilization; administration of personnel and medical records for non-participating Fleet Reserve and USN/USNR retired personnel; maintenance of retirement point credits; managing the Pretrained Individual Manpower Management System (PIHMS); recording all Naval Reservist participation in drills and maintenance of the Reserve Field Reporting System (RESFIRST); distribution control of enlisted personnel on active duty in the Training and Administration of the Naval Reserve (TAR) program; processing of Inactive Reserve retirements, resignations and other discharges; management of the Inactive Manpower and Personnel

Activity Group: Base Operations (Cont'd)

Information System (IMAPMIS) which involves collection, processing, maintenance, and dissemination of manpower and personnel information of the Inactive Force; and other Base Operations Support.

Funds provide material support, facilities, services and logistic support to Naval Reserve combat and combat support units. The operations financed, which are grouped under the major elements of Utility Operations, Personnel Operations, Base Operations-Mission, Base Operations-Ownership and Base Communications, are composed of:

- (1) Operating Aircraft Intermediate Maintenance Departments (AIMDs). (Base Ops-Mission)
- (2) Administrative functions related to financial/resource management and automatic data processing (ADP) functions. (Base Ops-Ownership)
- (3) Supply functions/tasks including procurement, receipt, storage and issue of bulk liquid fuel. (Base Ops-Mission)
- (4) Maintenance of material functions such as major/minor repair and preventive maintenance of service craft. (Base Ops-Mission)
- (5) Medical and dental functions. (Personnel Ops)
- (6) Base operations functions/tasks such as security, air operations and port services. (Base Ops-Mission)
- (7) Purchase, produce and distribute utilities. (Utility Ops)
- (8) Other engineering support includes Public Works Departments administration, engineering services, custodial services, refuse/garbage collection and disposal, snow removal, movement of personnel effects for military families, equipment inspection and military family housing administration. (Base Ops-Ownership)
- (9) Personnel support; e.g., operation of food service facilities, BOOs, BEOs, Human Goals Programs, military Family Service Centers and libraries. (Personnel Ops)
- (10) Operation and maintenance of Civil Engineering Support Equipment (CESE). (Base Ops-Mission)
- (11) Purchase and maintenance of training equipment. (Base Ops-Mission)

(12) Development and maintenance of training systems, methodologies and curricula to meet the total training requirements of the Naval Reserve. (Base Ops-Mission)

(13) Maintenance of electronic equipment. (Base Ops-Mission)

(14) Procurement, installation and/or relocation of equipment and furnishings necessary to initially outfit those facilities/structures being constructed or modernized under the Military Construction, Naval Reserve Program. (Base Ops-Mission)

(15) The administration of communications functions, operation and maintenance of rapid communications systems, telegraph, administrative telephones, telephone distribution systems, communications lines, wire equipment, toll calls, and operation of message centers (Base Ops-Communications).

4. Program Increases		+10,241	
a. One-Time FY 1990 Costs	(+141)		
1) Micro-computer Purchase	+141		
Purchase of microcomputer hardware and software			
for the Naval Reserve Personnel Center.			
b. Other Program Growth in FY 1990	(+10,100)		
1) Medical Exportable Training.	+725		
This effort will provide group contract			
instruction for Selected Reservists in critical			
medical specialties. Training will meet			
requirements established in Navy Training Plans.			

Activity Group: Base Operations (Cont'd)

C. Reconciliation of Increases and Decreases (Cont'd):

FY 1991

FY 1990

FY 1989

2) Surface Exportable Training. +979
This effort will allow Selected Reservists to obtain required training that is not available at local Reserve Centers.

3) Continuing Medical Education. +158
Increase is associated with the planned increased accession of physicians to the Selected Reserve.

4) Course Modularization +415
Four additional Class "C" school courses will be modularized in accordance with Area Naval Training Plans.

5) Leadership Management Education Training +611
Full-time and certain Selected Reserve personnel to attend training.

6) Training materials development. +838
Increased requirements for Qualification Study Packages and Interactive Video materials as required by Area Navy Training Plans.

7) Surface Training Improvement Package. +603
Development of a field manager's guide, accompanying videotape and test bank for ten ratings.

8) Personnel Support Equipment (PSE) +557
PSE for Bachelor Housing to achieve adequate furniture replacement and improved habitability of rooms.

Activity Group: Base Operations (Cont'd)

<u>C. Reconciliation of Increases and Decreases (Cont'd):</u>	<u>FY 1989</u>	<u>FY 1990</u>	<u>FY 1991</u>
10) Morale, Welfare and Recreation	+206		
Support costs for two new fitness centers and expansion of five Child Development Centers.			
11) Organizational Clothing	+1,097		
Increased organizational clothing for Selected Reservists assigned to additional MIUW and Fleet Hospital units.			
12) Civilian Billets	+695		
Increased civilian support at Personnel Support Activities and for Construction Forces.			
13) Reserve Center Lease Renewal	+252		
Increased cost of Reserve Center leases that are being renewed at market rates versus the existing \$1 per year rates.			
14) Dining Facility Contracts	+339		
Conversion to item pricing at dining facilities requires revision of contracts for cashiers and other contract personnel.			
15) Maintenance of Installation Equipment	+427		
Increased costs associated with maintenance contracts on training devices (NAVTAG, SBS/DCT), intrusion alarm systems and physical security equipment.			
16) Other Contracts	+1,194		
Increase in contractor support as a result of completed Commercial Activities studies.			

Activity Group: Base Operations (Cont'd)

C. Reconciliation of Increases and Decreases (Cont'd): FY 1989 FY 1990 FY 1991

17) IMAPHIS +845

Implementation of the next phase of development of the Inactive Manpower and Personnel Management Information System.

18) RCCPDS Improvements +159

System programming and quality control improvements to the Reserve Component Common Personnel Data System.

5. Program Decreases

a. One-Time FY 1989 Costs (-671)

1) FY 1989 purchase of previously leased telephone instruments and telephone system studies. -671

b. Other Program Decreases in FY 1990 (-8,666)

1) Maritime Preposition Ships (MPS) -500
Offload training function to be mission funded by active Navy.

2) Navy Training Plans -704

Completion of the development phase of the Navy Training Plan effort in FY 1989.

3) Contractor Augmented Training (CAT) -624

Elimination of CAT associated with the increase in Exportable Training.

4) Utilities Costs -276

Increased costs based on reconciliation of prior year direct and reimbursable costs.

-9,337

Activity Group: Base Operations (Cont'd)

<u>C. Reconciliation of Increases and Decreases (Cont'd):</u>	<u>FY 1989</u>	<u>FY 1990</u>	<u>FY 1991</u>

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 3 - Other Support
Activity Group: Maintenance of Real Property (MRP)

I. Description of Operations Financed. This activity group includes maintenance and repair/minor construction of real property for the operation of six Naval Air Stations, two Naval Air Facilities, seven Naval Air Reserves, seven Naval Air Reserve Centers, sixteen Naval Reserve Readiness Commands, 228 Naval Reserve Centers and Facilities, one Naval Support Activity, the Naval Reserve Financial Information Processing Center, and the Naval Reserve Personnel Center. Their mission is to provide services and material in support of the Naval Reserve and other activities as designated by the Chief of Naval Operations. The objectives are to provide adequate and viable facilities for shore base readiness, protection of current plant investments and to continue to provide a physical environment conducive to recruiting, training and retaining skilled and motivated personnel. The strategy used by the Naval Reserve to most efficiently apply MRP resources is the Whole Center Repair Program (WCRP), which corrects all architectural, structural, electrical, plumbing, mechanical and safety deficiencies at selected Air sites or Reserve Centers. By this method, the useful life of these buildings can be extended until Military Construction Naval Reserve funds can accommodate replacement.

Budget Activity: 3 - Other Support
Activity Group: Reserve Advertising Activities

I. Description of Operations Financed. The Naval Reserve advertising program is built around a national plan, complemented by local advertising and an active public service campaign. Included in the overall advertising strategy is a media campaign targeted to include minority audiences with the objective of increasing the number of minority accessions. The Naval Reserve relies on a media mix that includes radio, paid printed advertising in magazines and newspapers, direct mail campaigns and recruiting booklets, pamphlets and posters to increase public awareness, portray opportunities and generate leads. The advertising effort is aimed at three program areas and the media mix is as follows:

A. General Enlisted (Veteran and non-prior service) - radio, placements in general circulation and high school magazines and direct mail.

B. Officer Programs (Veteran and Direct Appointment) - selected magazine and newspaper placements and direct mail.

C. Healing Arts - magazines, placements in selected healing arts journals and direct mail.

In addition to the program areas supported by national advertising, this effort supports officer and enlisted Training and Administration of Reserves (TAR), Sea and Air Mariner (SAM) and Officer Sea and Air Mariner (OSAM), and critical officer and enlisted programs through point-of-sale literature and field advertising funding. The advertising for each program area is designed to reach a specific target audience and the media mix is adjusted for maximum impact.

IV. Personnel Summary

There are no military or civilian personnel assigned to this activity group. Personnel who administer this program are included in the Reserve Recruiting activity group.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 2 - Depot Maintenance

I. Description of Operations Financed.

This budget activity provides funds for Naval Reserve aircraft depot level maintenance. Included are airframe revorks, engine overhauls and repair, and modifications to airframes, engines and avionics. Depot level maintenance of Naval Reserve ships is funded in Budget Activity 1 - Mission Forces. The costs of Contractor Engineering Technical Services (CETS) supporting Naval Reserve aircraft and pricing injection account adjustments for unique Industrial Fund and Stock Fund support are also included.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 2 - Aircraft Rework
Activity Group: Reserve Aircraft Rework

I. Description of Operations Financed. This activity group funds the maintenance and repair of Reserve aircraft and engines, modification installations, and other aircraft support as described below.

A. Airframe Rework - This program provides depot level maintenance and rework of aircraft major structure and airframe systems. The objective of the effort is to maintain a safe, flyable airframe at least-cost over the airframe's useful life by periodic return to a depot level maintenance activity. The following considerations are employed in determining annual airframe rework requirements:

1) Aircraft Service Period Adjustment (ASPA) is an inspection program designed to reduce depot maintenance costs by extending the service period for aircraft that are in satisfactory material condition. An ASPA requirements model schedules required airframe inspections based on individual aircraft period end dates (PED). Under ASPA guidelines, aircraft passing the inspection are deferred from depot maintenance for an additional 12 months (for most model aircraft).

2) Standard Depot Level Maintenance (SDLM). SDLM is performed on inducted aircraft to the extent that it is technically justified and cost effective. An aircraft is inducted into SDLM when it fails an ASPA inspection, or when a type commander inducts an aircraft directly on a priority basis because of operational considerations. In addition, there are certain model aircraft that are not included in the ASPA program and are inducted into SDLM at each PED.

3) Operational Service Period (OSP) initiatives related to increasing PEDs on selected aircraft are included, and rework manhour reductions resulting from Maintenance Requirements Review Boards. Expected savings from these initiatives are included in the requirements contained in this submission and are consistent with the recommendations made by the President's Private Sector Survey on Cost Control.

B. Engine Rework - The Engine Program is to accomplish the repair, modification, and overhaul of aircraft engines, gearboxes and torque meters installed in Reserve aircraft. The program objective is to have sufficient ready-for-issue engine modules in the Fleet pools so as to operate without resupply for 30 days in the event of mobilization. The quantities of individual Type/Model/Series (TMS) pool assets required to accomplish this objective will vary dependent upon mission and function. Engine SDLM reworks are directly related to aircraft rework.

Activity Group: Reserve Aircraft Revork (Cont'd)

C. Modification Installation - This program is for the installation of operational and safety oriented modifications in existing Reserve aircraft and special modifications that strengthen existing structures and extend their useful life beyond that which was originally engineered. These modifications are of special significance in that by their very nature they negate the necessity to procure new aircraft systems at a much higher cost while at the same time they provide the essential platform through which operational commitments are met. Requirements for the Aircraft Modifications program are generated by the Operational Safety Improvement Program (OSIP). OSIP, funded in the Aircraft Procurement, Navy (APN) appropriation, procures the modification kits which, when installed, effect the necessary improvements in the aircraft system. The Modification Program funds the cost of labor and material needed for the installation of these kits.

Individual aircraft modification installation funding requirements are based on two factors: modification kits currently on hand and those projected to be on hand in the budget year and the out-years. A coordinated and balanced program between kit procurement and kit installation is the objective. Modifications are also installed by Field Mod Teams in aircraft not scheduled for revork to ensure similar configuration of aircraft within a given unit. They are also installed in trainers to update flight and maintenance trainers to a configuration compatible with the Fleet items they simulate.

D. Aircraft Support - This program provides unscheduled services to the Fleet and enhances Fleet readiness by providing expeditious solutions for the correction of minor problems incurred during operations.

Activity Group: Reserve Aircraft Revork (Cont'd)

IV. Personnel Summary

There are no military or civilian personnel assigned to this activity group.

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 3 - Other Support

I. Description of Operations Financed.

This budget activity is subdivided into five components: base operations, maintenance of real property, Reserve management headquarters, Reserve recruiting activities and Reserve advising activities. The base operations component provides funds to maintain and operate facilities and provide services and material to support Naval Reserve activities and units. This includes such functions as administration, supply, base communications, other engineering support, collateral equipment for new construction, and purchase and maintenance of training equipment, and the development and delivery of training systems and methodologies.

The maintenance of real property component provides funds to maintain, repair, and perform minor construction, as necessary, to ensure that the physical plants of Naval Reserve activities are capable of supporting their training, operational and administrative functions.

The management headquarters component provides for the operation of the headquarters of the Director of Naval Reserve and the Commander, Naval Reserve Force. Funds in this component pay for administrative support including: civilian salaries, consumable supplies, communication services, TAD, and the cost of maintaining headquarters spaces.

The Reserve recruiting and advertising activities provide for the necessary support of Naval Reserve recruiting efforts. The Naval Reserve assumed overall responsibility for Reserve recruiting in FY 1985 with associated funding transferring from the O&M,N to the O&M,NR appropriation. The continued emphasis on Reserve recruiting and advertising reflects initiatives designed to allow the Naval Reserve to meet Navy Manpower Mobilization System (NAMMOS) driven accession goals and to attract qualified and motivated personnel into the Naval Reserve.

Budget Activity: 3 - Other Support (Cont'd)

Department of the Navy
Operation and Maintenance, Navy Reserve

Budget Activity: 3 - Other Support
Activity Group: Reserve Management Headquarters

I. Description of Operations Financed. Program encompasses the operation of the Director of Naval Reserve (Office of the Chief of Naval Operations) and the Commander, Naval Reserve Force (New Orleans, La.) headquarters. These headquarters provide policy, control, administration, and management direction, including the management of all resources (manpower, hardware, facilities, and funding) assigned to effect an optimum training posture and mobilization readiness. Funding provides civilian salaries and administrative support, including consumable supplies, office services support and travel.

II. Financial Summary (Dollars in Thousands)
